P.03

a hardener comprising an aliphatic polyisocyanate, said paint material and hardener being filled in two different containers within a spray can, and united only immediately prior application to their processing, and

a propellant comprising a mixture of propane and butane sprayed jointly with the paint material and hardener from the spray can, such that the weight ratio of paint material and hardener to propellant amounts to 75:25 to 70:30.

- The aerosol preparation according to 2. (Amended) claim 1, characterized in that the paint material has a number average molecular weight of from 2500 to 4500.
- (Amended) An aerosol preparation for two-component paint spray cans, comprising:

paint material comprising at least one MS (medium solid) acrylic resin containing OH-groups and having a medium solids content and a number average molecular weight of < 15000, said paint material having a low content of styrene and an OHnumber of between 130 and 140;

a hardener consisting of an aliphatic polyisocyanate, said paint mater #al and hardener being filled in two different

containers within a spray gan and united only immediately before their processing, and

ARD&ROE

a propellant comprising of a propane/butane mixture for spraying said paint material and hardener from the spray can, wherein the weight/ratio of paint material and hardener to propellant amount's to 75:25 to 70:30.

- 5. (Amended) /The aerosol preparation according to claim 4, wherein the paint maferial has a number average molecular weight of 9000 to 13\(\varphi\)00.
- An aerosol preparation for two-component (Amended) paint spray cans, comprising:

paint material comprising at least one LS (low solid) acrylic resin containing OH-groups and having a low solids content and a higher/styrene content, and with a number average molecular weight of/> 15000 and an OH-number of < 80;

a hardener comprising an aliphatic polyisocyanate, said paint material and hardener being filled in two different containers within a spray can and united only immediately before their processing; and
